

Class WhatsAppService

java.lang.Object
WhatsAppService

All Implemented Interfaces:

NotificationMedium

```
public class WhatsAppService
extends Object
implements NotificationMedium
```

I passed the code from the EmailService class to ChatGPT and entered the following query: "Change the class from "EmailService" to "WhatsAppService" and the system output of the send method to "[WhatsApp] Sending message: ' + str '". Used as is. This class creates an WhatsApp service to alert a user via WhatsApp. It implements the NotificationMedium interface.
